

SECURING THE FUTURE OF EUROPEAN SME

THE ORIGIN

THE PAIN.

Organically grown SMEs run on expertise that was never written down (judgment frameworks, relational knowledge, technical intuition) trapped in the heads of founders and senior staff

"We do not have a plan to preserve knowledge"

3rd-generation CEO, German manufacturing SME

A SECOND BRAIN FOR THE BUSINESS BUILT BEFORE THE FIRST ONE WALKS OUT THE DOOR

- **Decision Library:** context layer behind the company's hardest calls
- **Vulnerability Inventory:** assessment of the criticality of tacit knowledge for the company's proper functioning
- **Operations Map:** who knows what – how the business actually runs

Done for you. Founders learn no new software.

THE WAVE IS HERE.

550k

German SMEs want
succession by the end
of 2029

digitalising analogue processes

WE ASK

Warm introductions

SME owners | Field experts

Insights from operators on transition challenges

Search Funds | M&A | PE

ANNEX.

HOW WE ACTUALLY CAPTURE KNOWLEDGE.

DOCUMENT ARCHAEOLOGY

invoices, contracts,
archived PDFs, internal
docs ingestion

WORKFLOW SHADOWING

Computer use tracking
of how work actually
happens

CONVERSATIONAL EXTRACTION

AI structured interviews
framed as storytelling

WE SIT IN A GAP NOBODY ELSE FITS.

Category	What they do	Why it doesn't reach our customer
Celonis / Process Mining	Mine digital event logs and operational data	Our customer often doesn't have structured event logs in the first place
Management Consultants	Analyze operations and tell founders what's wrong	Too expensive, too disruptive, and often perceived as judgmental
ERP / CRM Vendors	Capture transactions, workflows, and company data	They miss the tacit judgment and decision-making layer entirely
Omnivisor / Generalist AI Advisors	Run generic AI-driven optimization and cost-reduction projects	Too generalist; no methodology for extracting tacit operational knowledge
Internal Documentation Efforts	Founders attempt to document processes internally	They usually start the process, but rarely finish it
Search Funds & Private Equity	Acquire companies and replace or professionalize management	Solves the investor's continuity problem, not the founder's legacy problem

RISKS AND ACTION PLAN.

RESOLUTION

THE TECHNICAL BUILD

Product depends on AI tooling that doesn't exist as a finished stack today

Actively looking for a tech-cofounder

DATA PROTECTION AND METHODOLOGY

GDPR, Works Councils, and founder privacy are real constraints
